

Golden State Water Invests in Your Community

Golden State Water Company has invested approximately \$700 million over the last decade for infrastructure improvements in our water systems throughout the state. Our proactive philosophy and commitment to ongoing preventative maintenance ensures we can protect water from its source to your tap.

While California’s aging water infrastructure has drawn much attention this year, communities throughout the state are now realizing the importance of proactive system investments to protect their water systems and avoid the costly and sometimes dangerous effects of deferring maintenance.

Falling behind on critical water system maintenance and improvements can lead to pipe deterioration and breaks, increased public health risks, disrupted service, reduced water pressure and flow, or even water quality concerns.

Proactive system maintenance has always been an emphasis for Golden State Water. We continually invest to improve our water systems by upgrading both treatment and delivery systems in all service territories.

During the period from 2005-2015, Golden State Water has invested more than \$102 million to maintain and improve the water infrastructure in the Mountain Desert District—which includes the Apple Valley, Barstow, Calipatria, Morongo Valley and Wrightwood service areas.

These investments include water supply enhancements, distribution maintenance and ongoing improvements designed to replace old meters, mains and safety equipment. Listed below are the two most significant infrastructure projects Golden State Water has worked on in your district during the last decade:

- Emerald Plant – New well, reservoir, booster station and transmission main (Lucerne Valley) - \$4.6 Million
- Bear Valley Plant – Constructed two new reservoirs (Barstow) - \$2.8 Million
- Linnet Reservoir – Reservoir repairs, transmission main and earthquake valve installation (Wrightwood) - \$1.6 Million
- Uranium Wellhead Treatment – Removal study, system, facility and treatment (Morongo Valley) - \$1.7 Million
- Water Treatment Plant – Upgrades (Calipatria) - \$5.9 Million
