

Golden State Water Participates in Pomo Elementary School Career Day

Golden State Water Company (Golden State Water) was proud to participate in Pomo Elementary School's Career Day event on Friday, Sept. 22. Approximately 200 students engaged with Golden State Water's staff to learn about water treatment and the process of delivering quality, reliable drinking water to customers.

"Golden State Water really appreciated the opportunity to meet with these young students, and we're hopeful that our presentation will inspire some to pursue careers in the water industry," said Paul Schubert, General Manager of Golden State Water's Northern District. "We support our local schools and encourage the continued development of STEM curriculum to prepare our next generation of professionals."

Golden State Water has been providing high-quality, reliable water service to Clearlake for more than 35 years and enjoys taking an active role in the community.
