

## Water Use Efficiency

Golden State Water Company's (GSWC) Water Use Efficiency Department takes pride in offering programs to help residential homeowners, commercial/industrial businesses, and professional landscapers reduce their water usage. In addition to rebate programs, GSWC provides customers with free water conservation devices, including home conservation kits, low-flow bath and kitchen aerators, low-flow showerheads and water-efficient hose nozzles. Any of these items can be picked-up at your local customer service office or you can request a free conservation kit by [clicking here](#).

## Residential Rebate Programs

On September 21, 2009, a limited number of rebates became available through the SoCal WaterSmart program for Southern California residential water customers. Residential water customers are those living in houses or apartments, townhomes, condominiums or mobile home complexes with four or less dwellings that are NOT represented by a homeowners association or property management company. Changes have been made to the program in order to promote installation of water-saving devices while working within a reduced budget.

Funding is limited, and submitting a rebate application does not guarantee you will receive a rebate. Rebates will be issued on a first-come, first-served basis until funding runs out. Rebate reservations are not required. **Purchases made prior to September 21, 2009 are ineligible for Metropolitan Water District region-wide rebates.**

Eligible Device	Residential Customer Type	Rebate Levels/Funding Availability	Communities Served
