

## Water Supply Reliability Self-Certification Acknowledgement Golden State Water's Claremont System

Urban Water Supplier	Golden State Water Company Claremont (702)
2013 Production (in units selected)	11604.6
2014 Production (in units selected)	11052.1
Calculated Annual Potable Water Demand in Acre-feet (AF)	11328.350 AF
WY 2017 Total Available Water Supply	11508 AF
WY 2018 Total Available Water Supply	11945 AF
WY 2019 Total Available Water Supply	12338 AF
Individual or Aggregate	Individual
Conservation Standard *	-9 %
Higher Conservation Standard	No
Step 3.1 Notes and Comments	GSWC customers have done a tremendous job conserving and complying with the State's restrictions during the drought. We encourage all of our communities to continue to using water responsibly and keep the existing conservation momentum. As such, voluntary conservation targets may be proposed in the coming weeks pending actions by the CPUC in their upcoming resolution W-5103 to be heard by the commission on June 23rd. **
