

## Stay Hydrated This Summer With Infused Water

It's easy to stay hydrated and maintain a healthy lifestyle during the warm summer months when your water looks like a summertime treat! Adding fruits, vegetables, herbs and more is a fun and healthy way to add a boost of flavor to your drinking water!

During the month of July, Golden State Water Company (Golden State Water) is asking customers to share their favorite infused water recipes.

Customers who have a creative infused water recipe can share it on Twitter with the hashtag #GSWaterInfused, or email [waterways@gwater.com](mailto:waterways@gwater.com) for a chance to win a free Infuser water bottle. Photos and videos are encouraged!

Every Friday, Golden State Water will pick one inventive water infused recipe that will be shared on our social media channels for other customers to try.

At Golden State Water, an office favorite is citrus mint water, with grapefruit, lemons, cucumbers and a handful of fresh mint leaves.

We can't wait to hear how our customers infuse their water!
