

Golden State Water Company Announces Launch Of The “MyGSWater” Customer Portal Through KUBRA

Golden State Water Company (Golden State Water) today announced the launch of [“MyGSWater,”](#) a self-service web portal designed to enhance the customer experience via online convenience. Made possible through a partnership with KUBRA, MyGSWater is a highly-intuitive interface that allows customers to enroll in paperless billing, access payment history, schedule online payments and manage a personalized online profile.

“MyGSWater provides customers the ease and convenience to conduct a wide range of services from their computer or smartphone,” said Regina Cullado, Customer Service Manager for Golden State Water. “Customer satisfaction is the top priority for Golden State Water, and we are seeking new and innovated ways to improve the customer experience.”

The MyGSWater online platform is the latest in a series of online enhancements offered by Golden State Water. Last December, the company launched an online payment system whereby customers can make and schedule online payments through a password protected environment.
