

Golden State Water Invests in Your Community

Golden State Water Company has invested approximately \$700 million over the last decade for infrastructure improvements in our water systems throughout the state. Our proactive philosophy and commitment to ongoing preventative maintenance ensures we can protect water from its source to your tap.

While California’s aging water infrastructure has drawn much attention this year, communities throughout the state are now realizing the importance of proactive system investments to protect their water systems and avoid the costly and sometimes dangerous effects of deferring maintenance and replacements.

Falling behind on critical water system maintenance and improvements can lead to pipe deterioration and breaks, increased public health risks, disrupted service, reduced water pressure and flow, or even water quality concerns.

Proactive system maintenance has always been an emphasis for Golden State Water. We continually invest to improve our water systems by upgrading both treatment and delivery systems in all service territories.

During the period from 2005-2015, Golden State Water has invested more than \$61 million to maintain and improve the water infrastructure in the Orange County District—which serves the Los Alamitos and Placentia service areas.

These investments include water supply enhancements, distribution maintenance and ongoing improvements designed to replace old mains, wells, pumps, meters, and safety equipment. Listed below are four significant infrastructure projects Golden State Water has worked on in your district during the last decade:

- Orangethorpe Transmission Main – Construction of a new 16-inch transmission main in 2010 (Placentia) - \$3.1 Million
- Clair Well #5 – Drill and equip new well in 2012 (Los Alamitos) - \$2.6 Million
- Wilson Well No. 1 – Acquire site, drill and equip new well in 2014 & 15 (Placentia) - \$4.4 Million
- Peacock Pump Station – Replace aging pump station with new pump station in 2015 (Cowan Heights) - \$1.5 Million
