

Golden State Water Invests in Your Community

Golden State Water Company has invested approximately \$700 million over the last decade for infrastructure improvements in our water systems throughout the state. Our proactive philosophy and commitment to ongoing preventative maintenance ensures we can protect water from its source to your tap.

While California's aging water infrastructure has drawn much attention this year, communities throughout the state are now realizing the importance of proactive system investments to protect their water systems and avoid the costly and sometimes dangerous effects of deferring maintenance.

Falling behind on critical water system maintenance and improvements can lead to pipe deterioration and breaks, increased public health risks, disrupted service, reduced water pressure and flow, or even water quality concerns.

Proactive system maintenance has always been an emphasis for Golden State Water. We continually invest to improve our water systems by upgrading both treatment and delivery systems in all service territories.

During the period from 2005-2015, Golden State Water has invested more than \$140 million to maintain and improve the water infrastructure in the Southwest District, which includes the communities of Athens, Carson, Compton, Del Aire, El Camino Village, El Segundo, Gardena, Gardena Heights, Hawthorne, Inglewood, Lawndale, Lennox, Redondo Beach and Torrance.

These investments include water supply enhancements, distribution maintenance and ongoing improvements designed to replace old meters, mains and safety equipment. Listed below are the three most significant infrastructure projects Golden State Water has worked on in your district during the last decade:

- Budlong Reservoir Project in 2009 - Constructed two new reservoirs - \$5.5 Million
- Century Blvd. Main Replacement Project in 2014 - \$3.9 Million
- Southern Plant Iron and Manganese Treatment System in 2007 - \$2.8 Million
