

CONSTRUCTION NOTICE

Rehabilitation of West (#3) Tank @ Florista Plant

What	Rehabilitation of West Tank (#3) at the Florista Plant including repairs and replacing appurtenances and recoating of the reservoir.
When	Construction will commence on June 18, 2018. Anticipate project completion by end of September, 2018. Working hours shall be 8:00AM to 5:00PM Monday through Friday.
Where	Rehab and recoating of the West Tank will be done at the Florista Plant site located at 10852 Cherry St., Los Alamitos.
What to Expect	Construction crews with backhoes, dump trucks, crew trucks and large construction equipment will be going in and out of the Florista Plant site from Kaylor Street. The streets surrounding the Florista Plant site will remain open to traffic during the construction. The construction crews will make every effort to keep dust to a minimum. Please expect an increased level of noise during the construction period. As sections of the plant piping and reservoir are completed crews will disinfect the main and reservoir. This step is necessary to protect public health and to ensure compliance with the Waterworks Standards. Following the disinfection period, crews will flush the chlorinated water and any construction related sediment from the main and reservoir. Crews will dechlorinate the water before discharge. Generally, as underground activities are completed the crews will progress to the next underground sections and come back near the end of the project to perform any landscape and hardscape restoration as well as perform final cleanup.
Contacts	If you have any questions or concerns about the construction activities for this project, please call the Golden State Water Company Customer Service Center at (800) 999-4033.
