# CONSTRUCTION NOTICE

## Water Main Improvements

<b>WHAT</b>	Kelt Transmission Main Pipeline: Install approximately 7,000 feet of water main.
<b>WHEN</b>	Construction will commence on <u>08/19/2024</u> with completion expected by <u>01/16/2024</u> . Construction shall be limited to 7:00 am to 5:00 pm [No work on Weekends or Holidays]
<b>WHERE</b>	The new pipeline will be installed on Orcutt Hill Road into private property.
<b>WHAT TO EXPECT</b>	Construction crews with excavators, backhoes, dump trucks, crew trucks and other hand tools will be digging along the new pipeline alignment. Nearby streets will remain open to traffic during the construction period, but traffic control will be in place and traffic may be restricted to one lane traffic on portions of the road during construction hours. Access to driveways and parking may be limited for short durations of time. The construction crews will make every effort to keep noise and dust to a minimum. Please expect an increased level of noise during the construction period. Weekly activities such as trash pick-up will not be interrupted. Construction signs will be posted at the entrance of the road and the entrance to the private property. Hiking trails and parking lots will remain open to the public during construction. As sections of the new main are completed, the contractor will place temporary cold-mixed asphalt to cover the trench before returning near the end of the project to perform final paving of the trench. As the pipeline section is installed crews will disinfect the main. This step is necessary to protect public health and to ensure compliance with the Waterworks Standards. Following the disinfection period, crews will flush the chlorinated water and any construction related

	sediment from the main. Crews will dechlorinate the water before discharge. Generally, as underground activities are completed the crews will progress to the next underground sections and come back near the end of the project to perform final street paving repairs.
<b>CONTACTS</b>	If you have any questions or concerns about the construction activities for this project, please call the Golden State Water Company Customer Service Center at (800) 999-4033.

***Golden State Water Company thanks you for your patience while we work to improve your water system.***

*Ongoing investments in the treatment and delivery of water create sustainable, long-term value for customers in this water system.*
