

## A MESSAGE from your General Manager

Golden State Water Company (Golden State Water) has been serving reliable, quality water to Californians for more than 85 years. Over those eight decades we always put our customers first, because we understand that water is a critical part of our customers' lives. It's our responsibility to ensure every customer has quality water available from their tap when they need it.

All water providers have a duty to maintain and improve their infrastructure to ensure the safety and reliability of drinking water service. We take that responsibility seriously. That's why we have an aggressive infrastructure maintenance program and plan years ahead to address community needs.

As part of the required rate-setting process with the State of California, we recently filed a General Rate Case application for years 2019, 2020 and 2021. We've detailed the needed infrastructure investments proposed in the General Rate Case, so you are fully informed on the state of your water system and Golden State Water's plans to maintain the system in the future. If you have any questions, please visit our website at [gswater.com/Calipatria](http://gswater.com/Calipatria) or call us anytime at 800.999.4033.

On behalf of everyone at Golden State Water, thank you for being a valued customer.

Sincerely,

Perry Dahlstrom  
General Manager, Mountain Desert District  
Golden State Water Company

## Calipatria Benefit to Customers

Golden State Water Company (Golden State Water) invests to protect the safety and reliability of the local water system. We employ proactive maintenance programs and update our aging pipeline infrastructure on a replacement schedule of approximately 100 years. For comparison, the American Society of Civil Engineers recently published a report on the country's water infrastructure concerns, noting a national average replacement schedule of 200 years on pipes designed to last 75-100 years.<sup>1</sup>

In this 2019-21 GRC application, Golden State Water is proposing infrastructure investments totaling approximately \$2,406,000 for the Calipatria Customer Service Area to address water supply, storage and distribution needs.

<sup>1</sup> <https://www.infrastructurereportcard.org/wp-content/uploads/2017/01/Drinking-Water-Final.pdf>

## KEY PROJECTS (proposed)

Following are capsule summaries of key upcoming projects:

- **Pipeline Replacement Program:** An investment of approximately \$159,000 is proposed to replace aging water pipes to improve water system operation and reliability.
- **Niland Reservoir Decommissioning and Removal:** An investment of approximately \$82,000 is proposed to decommission and remove the Niland Reservoir building.
- **Holabird Plant Improvements:** To improve the efficiency and reliability of the Calipatria System, an investment of approximately \$1,175,000 is proposed to construct a new solids treatment system.
- **Blair Booster Pump Facility Improvements:** An investment of approximately \$387,000 is proposed to optimize the operation and functionality of the Blair Booster system.

This was not reviewed or approved by the CPUC. It is meant solely as supplemental information, from Golden State Water, to the official notice.

## Why Water Rates Are Increasing

Water system improvements

Taxes

Supply and operating costs

## 2019-21: PROPOSED WATER RATES

Golden State Water Company (Golden State Water) delivers quality drinking water and reliable service 24 hours a day, 7 days a week, to approximately 1,200 customers in the Calipatria service area, which includes all or portions of Calipatria, Niland and some adjacent Imperial County territory.

The rate adjustments and infrastructure investments proposed for 2019-2021 are pending approval through the General Rate Case (GRC) process. Any adjustment to current rates would not be implemented until Jan. 1, 2019 at the earliest.

If the GRC is approved as filed, local customers would see the following rate impact:

- An average residential customer in the Calipatria Customer Service Area with a 5/8 x 3/4" meter, using 8,976 gallons (1,200 cubic feet or 12 Ccf) of water per month, would see a monthly bill increase of \$2.22 from \$61.62 to \$63.84 compared to 2017 (excluding any applicable surcharges).

### EXPENSES

Approximately 76% of the costs to operate, maintain and improve the water system don't change when customers use less/more water.

### REVENUE

Approximately 70% of the revenue collected from water bills is variable. When usage decreases, rates must eventually increase to cover fixed costs.

**RATES**

## HOW WATER RATES Are Set

Golden State Water Company (Golden State Water) is regulated by the State of California to ensure rates are reasonable and reflect the full cost to provide water service, maintain the infrastructure and make needed system improvements.

Every three years, Golden State Water is required to file a General Rate Case (GRC) with the state to propose a rate structure that recovers the revenue needed to meet operating expenses and necessary infrastructure improvements over a three year period. Golden State Water filed its GRC application for the years 2019, 2020 and 2021 on July 19, 2017.

The GRC process is thorough and takes approximately 18 months to ensure rates are fair and provide reliable, quality water service. Customers are encouraged to participate in the ratemaking proceedings, and their interests are protected throughout the process by the state's Office of Ratepayer Advocates.
