

Proactive investments in system maintenance and new infrastructure are designed to *ensure the safety and reliability of your water system.*

The rates adopted for 2025-2027 will provide customers with long-term value by investing more than **\$76 million** in proactive capital investments and maintenance of local water infrastructure essential to the delivery and treatment of reliable, quality water.

Southwest Customer Service Area Capital Improvements, 2024-2026

Investments in the Southwest District Service Area include but are not limited to upgrading water distribution infrastructure and structural modifications to plant facilities, recoating and performing safety/health/code modifications to reservoirs, improvements to water quality and supply, drilling a new well, new systemwide technology to efficiently maintain reliable operation of the water system, street improvements, emergency generators that can support the distribution and treatment of water during emergencies and natural disasters, and the replacement of aging mains, meters, and pumping and purification plant equipment. As part of our commitment to reliability and public safety, Golden State Water proactively invests in upgrading and maintaining its fire hydrants.

Our proactive investments to replace and protect your water infrastructure system:

Ensures the safety and dependability of the local water system.

Protects the environment by reducing the company's carbon footprint and its energy demands.

Upholds the fundamental right of every Californian to access safe, clean and affordable water.
